SECURE SOFTWARE, CUSTOM-ENGINEERED

WHO WE ARE

The team behind the *platforms*

SecurePath Technologies Limited builds tailored, secure software that streamlines mission-critical operations. Founded in 2025 and headquartered in Nairobi, we partner with universities, educational institutions, examination boards, government agencies and enterprises across the region — combining deep domain knowledge with security-first engineering.

Vision

To be the trusted backbone of secure digital operations across sectors.

Mission

To empower organizations through innovative, reliable and secure solutions.

WHY SECUREPATH

Why organizations *choose us*

Four things every SecurePath platform is built on — from the first line of code to the day it runs in your operation.

You Say IT, We Solve IT.

DEEP DOMAIN EXPERTISE

Real experience in examinations, credentials, education and secure logistics — we speak your workflow.

CREDENTIAL INTEGRITY

Cryptographic verification that makes fake certificates and forged documents fail instantly.

02

EXPERTISE

01

SECURITY

SECURITY-FIRST ENGINEERING

Encryption, role-based access, tamper-evident audit trails and IDOR-safe design are defaults, not add-ons.

BUILT FOR AFRICAN REALITIES

Offline-first, low-bandwidth and SMS-fallback design so systems work where the work actually happens.

04

ANTI-FORGERY

IMPACT BY THE NUMBERS

Measurable results, *built in*

Every figure on this page is a checkable fact about our platforms — from national pilot deployments to production systems running today.

AUDIT TRAIL every mark journaled

DIGITAL ON-SCREEN MARKING

EvalPro

Secure digital evaluation for high-stakes exams

✓ 2 NATIONAL PILOTS · TVET · KNEC (KENYA)

EvalPro digitises physical answer scripts and moves marking on-screen — anonymous, auditable and paperless. Built for educational institutions and examination boards across the full assessment lifecycle — from script intake to published results, within shorter lead times.

- ✓ **End-to-end pipeline**
Scripts in, results out — one governed flow.
- ✓ **Anonymous allocation**
Examiner and student identities masked end to end.
- ✓ **Automated scoring & moderation**
Analytics-driven reporting and moderator workflows.
- ✓ **Tamper-evident audit trail**
Every mark journaled, attributed and reconstructable.

Cuts grading turnaround by 40%+ while reinforcing institutional integrity — and delivering monetary benefits.

SECURE EXAMINATION LOGISTICS

Tamper-Evident Labels & Bags

Customizable security seals for exam boards & institutions

Serialised tamper-evident bags and labels that protect question papers, answer scripts and confidential materials in transit and storage. Any attempt to open, cut, heat or peel a seal leaves an irreversible VOID trace — so a compromised consignment is obvious at a glance.

Irreversible VOID reveal

Opened, heated or peeled seals expose a permanent warning pattern.

Fully customizable

Board branding, sizes, colours, tear-off receipts and numbering.

Serialised & barcoded

Unique serials, barcodes and QR for chain-of-custody scanning.

Built for exams

Question papers, answer scripts, certificates and evidence bags.

Every bag tells you whether it was opened — before anyone breaks the seal.

SERIALISED

VOID-REVEAL

BARCODE & QR

ASSET TRACKING & SECURE LOGISTICS

Yekkada

GPS · Bluetooth · biometric smart e-locks

Live, auditable control of high-value assets — GPS, RFID and BLE tracking with biometric smart padlocks and a tamper-proof chain of custody, from warehouse to destination.

- **Multi-mode tracking**
GPS, RFID and BLE — indoor and outdoor.
- **Geofencing & route alerts**
Deviation and dwell-time alerts in real time.
- **Biometric smart e-locks**
IP67 padlocks, Bluetooth unlock, tamper alerts.
- **Chain of custody**
Photo, location and timestamp on every hand-off.

Turns opaque asset movement into a live, auditable map — origin to destination.

Smart lock sealed

Biometric · IP67 · tamper detection on

WAREHOUSE · SEALED 06:40

24/7 live tracking

IN TRANSIT · LIVE GPS

100% chain of custody

3 tracking modes

E - CERTIFICATE GENERATION

E-Certificates

Secure digital certificate generation & issuance at scale

Design, generate and issue verifiable digital certificates in bulk — from a single template to thousands of personalised, signed credentials, each carrying a unique verification code and QR.

- 1 Template-driven design**
Brand a certificate once, then issue thousands.
- 2 Personalised at scale**
Names, grades and dates merged automatically.
- 3 QR + unique code**
Every certificate instantly verifiable online.
- 4 Digital delivery & revocation**
Email or portal distribution; revoke any time.

Issue credentials in minutes — each one verifiable, trackable and revocable.

ANTI-FORGERY CERTIFICATES

Secure Certificates

Cryptographically-secured physical credentials

Physical certificates protected by a cryptographically encoded, photo-linked 2D barcode. Anyone can verify authenticity in seconds — even offline — and forged or altered documents fail instantly.

- ✓ **Cryptographic 2D barcode**
Signed data embedded in the document itself.
- ✓ **Photo-encoded verification**
The holder's identity travels with the credential.
- ✓ **Offline verification**
Validate anywhere — no connectivity required.
- ✓ **Eliminates fakes**
Forged or tampered documents fail instantly.

AES-256 encryption

100% tamper-evident

Seconds to verify

Ends certificate forgery and fake-document fraud — offline, in seconds.

VARIABLE DATA GENERATION

Variable Secure Code

Secure serials, promo cards & variable print

An automated engine that generates large volumes of unique, secure codes and variable data — for promo cards, vouchers, admit cards, mark sheets and secure documents — with anti-counterfeit features built into every item.

Millions of codes per run

Collision-free, unpredictable and fully traceable.

Variable-data print

Merge names, serials and QR into print pipelines.

Promo cards & vouchers

Concealed PINs with secure activation workflows.

Anti-counterfeit layers

Secure fonts, QR and proprietary symbologies.

Industrial-scale secure production — authenticity guaranteed on every item.

1M+ codes per run

0 collisions

100% traceable

SECURE FONTS

SCHOOL MANAGEMENT · CBE

Alama

Customizable smart school ERP · works fully offline

A complete school management platform with competency-based assessment (CBE) built in. Built for Kenyan educational institutions and adaptable to other countries and boards — with every module configurable to the institution's needs.

✓ Fully offline

Runs without internet; syncs when a connection returns.

✓ Multi-board ready

Kenyan curriculum first; configurable for any board.

✓ CBE assessment engine

Rubrics, competency tracking and automated reporting.

✓ Full school ERP

Students, staff, fees, timetables, transport and library.

One platform for the whole institution — working even where the internet doesn't.

FINANCE FOR SMALL BUSINESS

Ledgerly

Expense & cash-flow tracking, made simple

A lightweight finance tracker that records expenses, income and receipts in seconds, categorises spending automatically and shows small businesses exactly where their cash is going — every day, not just at month-end.

Expense capture

Log spending and attach receipts on the spot.

Cash-flow view

Money in vs money out, daily and monthly.

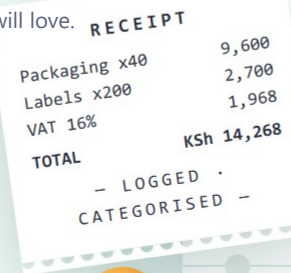

Auto-categorisation

Spending sorted into clear categories, automatically.

Reports & exports

Simple summaries your accountant will love.

KSh

KSh

Clarity over every shilling — before the month ends.

Daily cash-flow view

Seconds to log an expense

Auto categorised

THE WIDER CATALOGUE

Beyond the core: more *secure* *platforms*

Four more production platforms from the same security-first engineering — sales automation, document management, campus identity and offline credential checks.

+ Fully custom builds, engineered around your specific operation.

SecurePath
TECHNOLOGIES LIMITED

OUR SERVICES

Web, mobile & desktop software, *engineered around your operation*

We are a custom software company. We build web applications, mobile apps for Android & iOS and desktop applications, together with the cloud platforms and secure systems behind them. We don't sell a template — we study how your organization actually works, then design, build and secure a platform around it.

You Say IT, We Solve IT.

• 8 SERVICE LINES • ONE PARTNER

SECUREPATH TECHNOLOGIES LIMITED • +254 716 220 000 • INFO@SECUREPATHEA.COM • NAIROBI, KENYA

INDUSTRIES WE SERVE

Trusted across *sectors*

From national examination boards to logistics fleets — one security-first engineering team behind every sector.

Universities & Colleges

Secure exams, credentials and campus identity.

Government & Public Sector

National-scale, high-stakes operations.

Examination Boards

Marking, results, tamper-evident bags and anti-forgery certificates.

Schools — Basic Education

Offline assessment, attendance, parent comms.

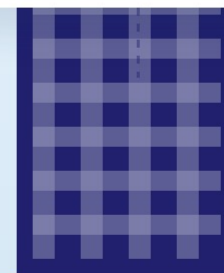

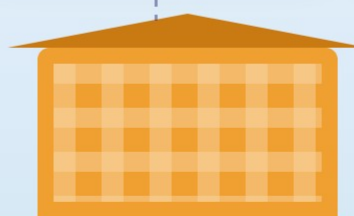

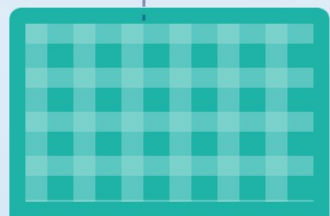

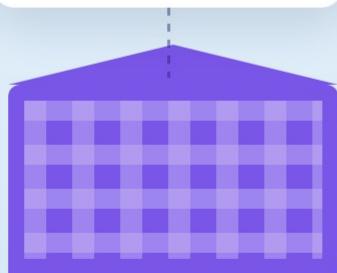

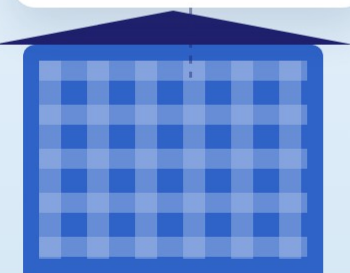

Enterprise & SMEs

Custom platforms, finance tools, secure ops.

Logistics & Supply Chain

Asset tracking, smart locks, chain of custody.

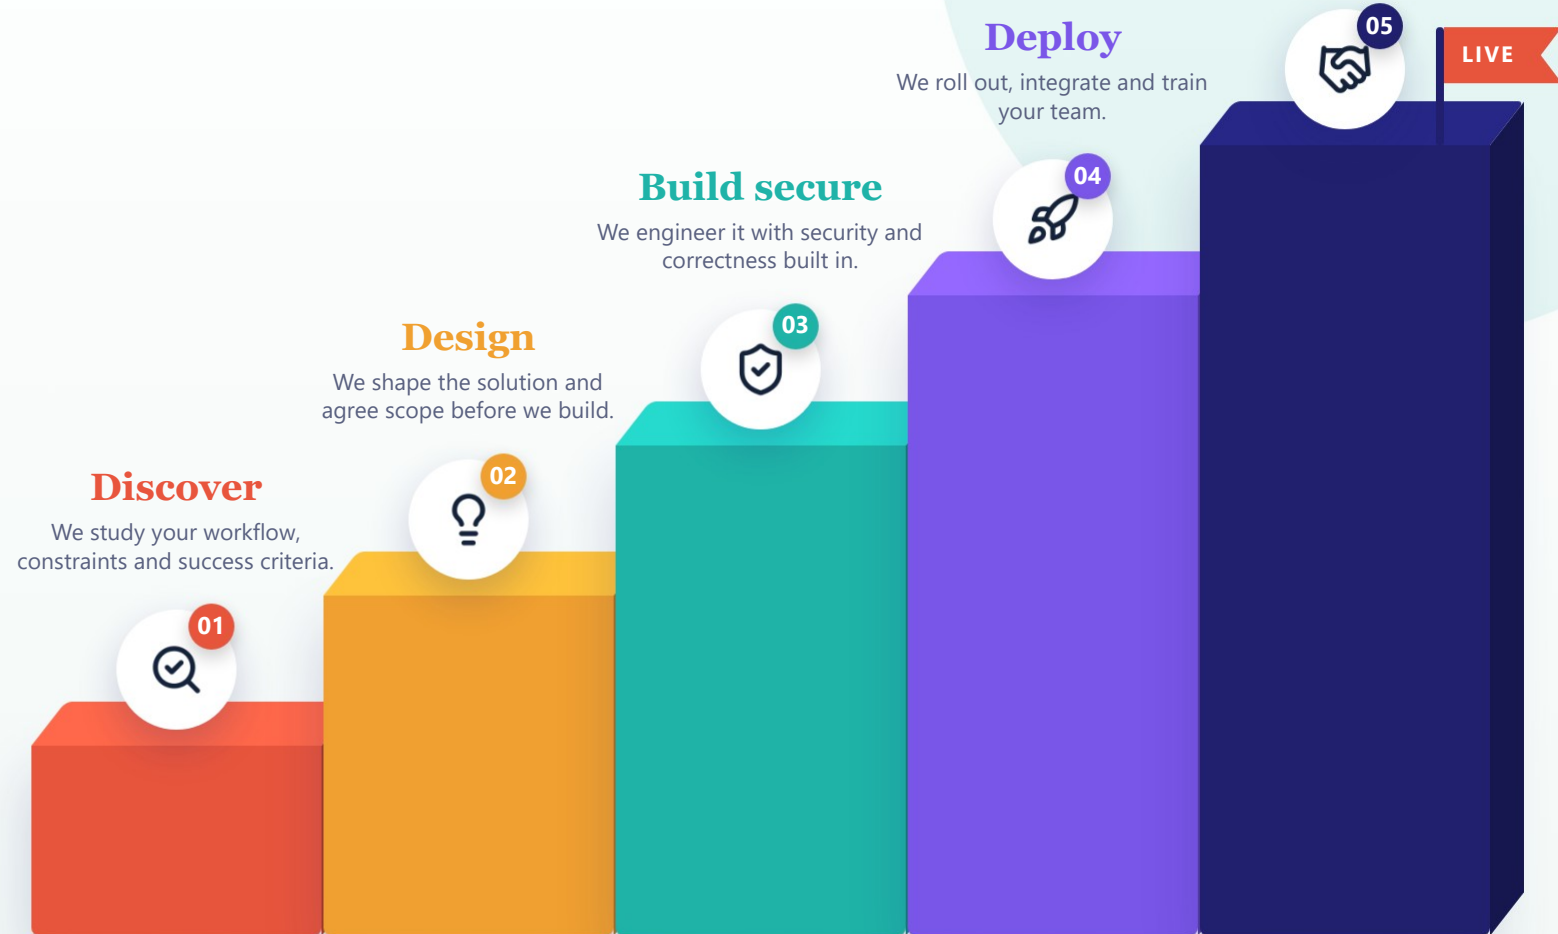

HOW WE WORK

Five steps to a *secure platform*

One accountable team from the first workshop to the day your platform runs in production — and every day after.

You Say IT, We Solve IT.

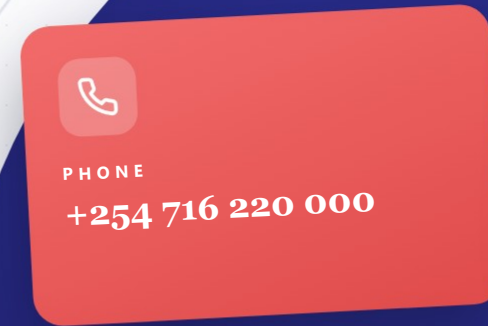

LET'S WORK TOGETHER

Let's build something *secure* together.

Tell us the problem. We'll engineer the solution — as a web, mobile or desktop platform built around your operation.

You Say IT, We Solve IT.
